AND TRAINING GROUP
Edwards Air Force Base, California 93523

ATTG Reg 355-4

1 February 1974

Disaster Preparedness

NUCLEAR ATTACK ACTIONS

This regulation describes the actions to be taken by key personnel during an actual nuclear attack situation.

1. Policy. It is expected that a nuclear attack will be preceded by an increased alert posture. This time period should permit advance dispersal of unit aircraft and allow the area to be properly secured. The Commander ATTG has designated the following facility as the Unit fallout shelter:

Bldg. 3804, Engine Test. Protection Factor: 2-8; Capacity 1615.

2. Responsibility.

a. The Commander ATTG shall be responsible for the safety of his personnel and equipment.

3. Procedures.

a. The Commander ATTG will be notified immediately of alert status. He will then determine whether or not to exercise the pyramid alert.

b. After notification of alert, the Commander ATTG will direct the dispersal of unit aircraft, personnel, and equipment.

(1) He will advise ATTG personnel when to man the assigned shelters.

c. The Disaster Preparedness Officer will activate the unit Control Center and assist the Commander.

(1) He will insure that unit manning reports are forwarded to higher headquarters.

d. Personnel assigned specific duties will proceed to their assigned duty locations.

Supersedes ATTG Reg 355-4, 8 November 1972

OPR: Ops

DISTRIBUTION: X

FOR OFFICIAL USE ONLY

e. Emergency Essential Civilians should report to work.
